

ESTeem
SECURE WIRELESS NETWORKING

ENERGY WIRELESS SOLUTIONS

Energy demand has never been greater. Assets are now even more remote and “Green Energy” technologies are being rapidly deployed. Improving productivity and efficiency depends on access to secure, real time information. But, in order for any of this data to be useful and actionable information, it must be captured and processed. Reliably and consistently.

Energy and utility systems face exceptional hurdles in accessing the vital data available due to an aging infrastructure, longer distances and challenging terrain.

- **Energy Management**
- **Remote Asset Monitoring**
- **Real Time Communications**
- **Secure Infrastructure Conversion**
- **Remote Security Cameras**

Why Choose ESTeem?

Expertise

ESTeem Industrial Wireless Solutions are successfully deployed in the Energy industry for now more than 40 years.

Modernize

ESTeem provides unsurpassed speed and range to deliver the reliable and secure wireless networks required today to provide complete connectivity to critical IT, operations control systems and remote asset data.

Reliable

Scalable, redundant wireless networking over large geographical areas become a reality using ESTeem's Industrial MESH technology.

FCC
Licensed

150-174MHz 217-220MHz 450-470MHz

Unlicensed

900MHz 2.4GHz 5.8GHz  Cellular
