

Virtual Schoolhouse Suite

ESTeem's Virtual Schoolhouse Suite brings unprecedented possibilities for education administrations having to manage their networks and deliver online solutions. The benefits and necessity have never been more evident, but online education faces some unique challenges compared to traditional campus centric learning. Secure internet connectivity is the lifeblood for online education.

ESTeem's Virtual Schoolhouse Suite is an ideal solution for remote learning. By creating Mobile Learning Centers and/or secure VPN connections, the **Virtual Schoolhouse Suite** delivers reliable and secure remote connectivity for students and faculty.

Build and Customize your Virtual Schoolhouse

- 1** The **ESTeem Edge Access+** uses an LTE connection to a school bus or van while simultaneously providing a WiFi Access Point (AP) to provide reliable and secure remote internet connectivity in underserved areas. Increase your WiFi coverage outside the bus by adding an ESTeem Horizon 2.4 Rugged Access Point. Instant Mobile Learning Center!
- 2** Quickly create secure, encrypted, automated VPN connections directly from your School Servers or your School Cloud to Faculty, Teachers and Students regardless of internet connection type.
- 3** Create and manage your own critical infrastructure networks
