

Factory Floor Wireless Solutions

AGV's, Automated Pallet Systems, Robotics, Smart Manufacturing, IIoT integration and the connected workforce are fundamentally transforming today's Factory Floor. Improving productivity and efficiency depends on secure access to real time information. But, in order for any of this data to be useful and actionable information, it must be captured and processed. Reliably, securely and consistently.

ESTeem Industrial Wireless Solutions have been successfully deployed on the Factory Floor for more than 30 years. **ESTeem's** ruggedized, industrial wireless modems are built to be an essential component of the Factory Floor communications infrastructure. **ESTeem** provides ruggedized **900MHz** and WiFi Access Points (AP) and clients with the required speed, range and roaming capabilities to deliver the reliable, isolated and secure wireless networks required today to provide complete connectivity.
